

Eagle Drive Bicycle Counts: Westbound bike lane

A mobile bicycle count unit was placed on Eagle Drive at Central Avenue in the westbound bike lane. The counter was in place for approximately four weeks, which included Spring Break March 13-18.

The average weekday count, without Spring Break, is 32 trips.

The average weekend count is 13 trips.

There were no counts conducted prior to the beginning of road construction. These counts have not been adjusted or extrapolated to project average daily traffic, but instead reflect raw data to provide a general sense of daily usage.

Eagle Drive Bicycle Counts: Eastbound bike lane

A mobile bicycle count unit was placed on Eagle Drive at Central Avenue in the eastbound bike lane. The counter was in place for approximately four weeks, which included Spring Break March 13-18. The counter unit experienced a few errors, resulting in insufficient data collection during the first week.

The average weekday count, without Spring Break, is 17 trips.

The average weekend count is 7 trips.

There were no counts conducted prior to the beginning of road construction. These counts have not been adjusted or extrapolated to project average daily traffic, but instead reflect raw data to provide a general sense of daily usage.
